## Complex Analysis Lecture Notes - UC Davis Mathematics

1 Introduction: why study complex analysis? These notes are about complex analysis, the area of mathematics that studies analytic functions of a complex variable and their properties. While this may sound a bit specialized, there are (at least) two excellent reasons why all mathematicians should learn about complex analysis.

students, complex analysis is their first rigorous analysis (if not mathematics) class they take, and these notes reflect this very much. We tried to rely on as few concepts from real analysis as possible. In particular, series and sequences are treated "from scratch". This also has the (maybe

### COMPLEX ANALYSIS - LTH

4 1 COMPLEX FUNCTIONS Exercise 18 Consider the set of symbols  $x+iy+ju+kv$ , where  $x, y, u$  and  $v$  are real numbers, and the symbols  $i, j, k$  satisfy  $i^2 = j^2 = k^2 = -1, ij = -ji = k, jk = -kj = i$  and  $ki = -ik = j$ . Show that using these relations and calculating with the same formal rules as in dealing with real numbers, we obtain a skew field; this is the set

### **Complex Analysis - Xue-Mei**

Complex Analysis is concerned with the study of complex number valued functions with complex number as domain Let  $f: \mathbb{C} \rightarrow \mathbb{C}$  be such a function What can we say about it? Where do we use such an analysis? Complex Differentiation is a very important concept, this is allured to by the fact
